File set up and sizes

- 📌 Our magazines are available in both standard sizes (such as A4 or Letter), and in dynamic sizes.

Standard sizes for magazines

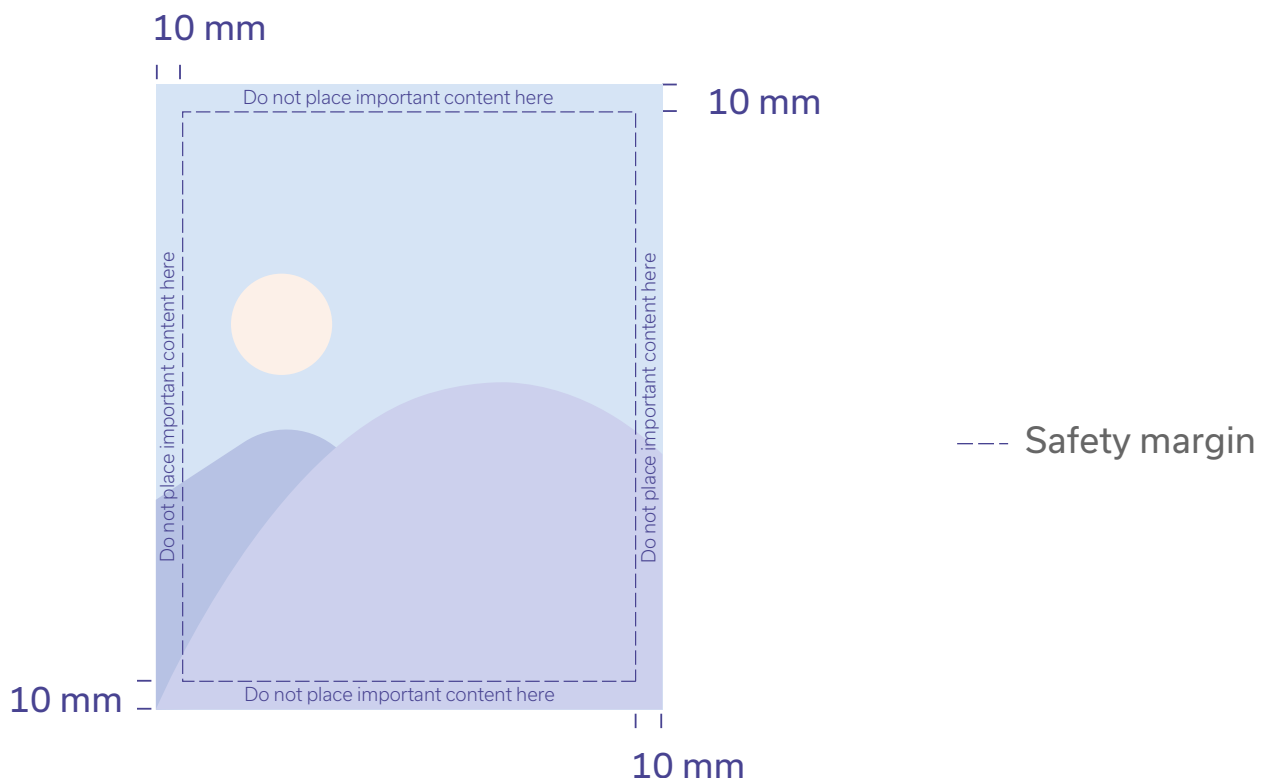

Size	Orientation	Dimensions (mm/in)
A5	Landscape	148 x 210 mm / 5.8 x 8.3 in
A5	Portrait	210 x 148 mm / 8.3 x 5.8 in
A4	Landscape	210 x 297 mm / 8.3 x 11.7 in
A4	Portrait	297 x 210 mm / 11.7 x 8.3 in
Letter	Landscape	216 x 280 mm / 8.5 x 11.0 in
Letter	Portrait	280 x 216 mm / 11.0 x 8.5 in

- 📌 The size of the non-standard magazines depend on the aspect ratio of the PDF (width ÷ height).
- 📌 We read the first page to determine the aspect ratio and display matching product sizes.
- 📌 The aspect ratio must be between **0.34 and 1.54**
- 📌 *Dynamic Format Ranges*: Each product has a minimum and maximum width and height. You can find these ranges in the table above.
- 📌 Content will never be cut or distorted; we only adjust the size downward unless your file is smaller than our smallest product.

- ✎ Use a resolution of 300dpi.
- ✎ Set the color profile to RGB.

Cover and content

- ✎ Our magazines range from 18-500 pages. Your magazine has to contain an even number of pages.
- ✎ Save your print file as one PDF document containing both the cover and content as single pages.
- ✎ Do not add bleed or cut marks, as our system will automatically generate these.
- ✎ Please leave a minimum margin of 10 mm on all sides of both the cover and content pages.

Layout

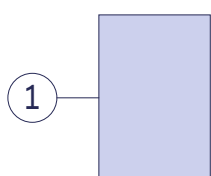

The following diagram illustrates how your magazine will appear once printed. The numbered text below corresponds to the numbers displayed on the image. Please note that this diagram is for illustrative purposes only.

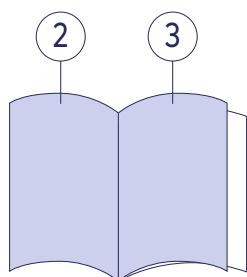

= Cannot be printed

= Can be printed

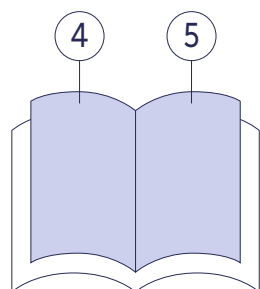

1. Front cover: The first page of your PDF.

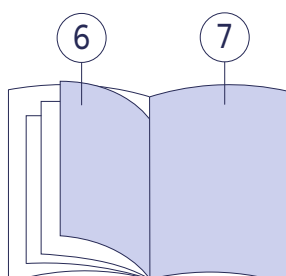

2. Inside of front cover: page two of your PDF, which will appear on the *left-hand* side.

3. Page three of your PDF.

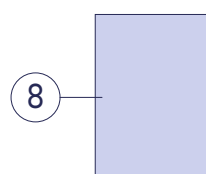

4. This is page four of your PDF.

5. This is page five of your PDF.

6. This is page six of your PDF.

7. Inside of back cover will be the second-to-last page of your PDF.

8. Back cover: The last page of your PDF.

Spine

We use an automated system to calculate the spine size of our magazines. This calculation is based on:

- 📄 The number of pages in your PDF
- 📄 The type of paper used
- 📄 The destination country of your order

Due to this automated process, specific spine size information is not available in this document. For more information, please access our Help Center through the following link <https://support.peecho.com/hc/en-us/articles/360010630800-How-do-I-add-the-spine>.

** The Spine feature is only available to users with a Peecho Merchant account. Upload & Order does not support this feature.*

Saving your PDF

We recommend exporting your file with a PDF / X-4 Profile (coated FOGRA 39) check on your file. Please ensure that all fonts are embedded and any transparencies are flattened.
